Document	User Guide – Version 1.0 – Semester 1 Course Project

This document is a short user guide for the main functions of the LegalEase website. It is written from the frontend and backend actually implemented by the group, so every screen described below exists in the delivered application.

1. Introduction

LegalEase is a web-based legal service platform that connects individuals and businesses with verified lawyers. Customers can search lawyers by legal specialization and by city/province, read verified profiles and ratings, book a one-hour consultation on a real time slot, pay the consultation fee and leave a review after the meeting. Lawyers manage their professional profile, their working schedule and their appointment requests. The Administrator verifies lawyer accounts and supervises the whole platform.

The system supports three roles: **Customer**, **Lawyer** and **Administrator**. A visitor who is not logged in (Guest) can search and read profiles, but must register before booking.

Role	Demo email	Password
Administrator	admin@legalease.com	123456
Lawyer	lawyer@gmail.com	123456
Customer	tantuyen@gmail.com	123456

2. Home Page

When the website opens, the Home page is displayed. The top navigation bar contains **Home**, **Find Lawyers**, **FAQ**, **About Us** and, for visitors who are not signed in, the **Login** and **Register** buttons.

The banner area holds the main search box, where the user can type a legal issue or a lawyer name and filter by **specialization** and by **city / province**. Below the banner the page shows the *Featured verified lawyers* carousel with the rating, the city and the practice areas of each lawyer, and the *Legal News* section published by the Administrator. The footer contains the office information, the quick links and the link to the **Sitemap**.

[Screenshot: LegalEase home page]

3. Register and Login

Click **Register** to open the *Create an account* form. Enter the full name, email, password, password confirmation, phone number and choose the **Account type**.

- If **Customer** is selected, the form only asks for the basic information and the account can be used immediately after registration.
- If **Lawyer** is selected, the form asks for extra professional details: city / province, years of experience, one or more specializations, professional biography, national ID number, bar licence number and the licence / certificate files (PDF, JPG, PNG or WEBP, up to 5 files, max 3 MB each). The account stays in **Pending** status until an administrator approves it, and the lawyer does not appear in the public directory before approval.

To sign in, click **Login** and enter the email and the password. After a successful login the system opens the portal that matches the role of the account. If the password is forgotten, click **Forgot password?** and follow the reset link sent by the system.

4. Search Lawyer and View Profile

Open **Find Lawyers** from the navigation bar. The directory lists every verified and active lawyer. Results update instantly while typing, and the list can be filtered by specialization and by city/province and sorted by **highest rating**, **most experience** or **name**. Each row shows the photo, the verified badge, the rating, the city, the years of experience, the hourly consultation fee and the practice areas.

Click **View Profile** to open the lawyer detail page, which contains the introduction, the practice information (area, practising since, office address), the practice areas, the awards and certifications, the service fee with the accepted payment methods, and the recent reviews written by previous clients, filterable by star rating.

[Screenshot: Find Lawyers page and lawyer profile page]

5. Book an Appointment and Pay

On the lawyer profile page click **Book Appointment**. The booking page shows the lawyer summary and the calendar of available dates.

1. Choose a date in the date strip. The page lists only the one-hour slots that the lawyer has opened and that are still free.
2. Select a time slot and, if you wish, write a short description of the legal issue in the text box.
3. Check the total consultation fee and click **Request Appointment**.
4. The booking is created with the status **Pending** and the system opens the **Payments** page, where the fee can be paid by credit / debit card, Apple Pay, Google Pay or bank transfer. An unpaid booking is cancelled automatically after the payment deadline.
5. The lawyer then confirms or rejects the request, and the customer receives a notification. When the meeting is finished the appointment becomes **Completed** and can be reviewed.

Cancellation and refund: a paid appointment cancelled less than 24 hours before the meeting refunds 0%; the refunded part increases the earlier the cancellation is made, and a booking cancelled more than 15 days in advance is refunded almost in full. The refund is processed automatically once the cancellation is confirmed.

6. Customer Portal

Page	What the customer can do
Dashboard	See the upcoming appointments, the pending payments, the number of completed consultations and the next consultation

Page	What the customer can do
Find Lawyer	Search, filter and sort the verified lawyer directory, open a profile and start a booking
Appointments	Track every booking by status (Pending, Confirmed, Completed, Cancelled), read the cancellation policy, cancel a booking or open the review form
Payments	See the paid, pending and refunded totals, the accepted payment methods and the full billing history
Reviews	Give a star rating and a comment for a completed consultation and read the reviews already published
Notifications	Read booking confirmations, payment updates, reminders and account activity, and mark them as read
Your Profile	Update the full name, email, phone, address, gender, birth date, profile photo, and change the password

[Screenshot: Customer dashboard and My Appointments page]

7. Lawyer Portal

Page	What the lawyer can do
Dashboard	See the earnings overview (the lawyer receives 80% of each completed paid consultation, LegalEase keeps a 20% platform fee), the number of pending, confirmed, completed and cancelled appointments, the average rating, the expected upcoming income and the client analytics by region, age group, gender and legal matter
Work Schedule	Create one-hour availability slots between 07:00 and 23:00, over a date range and up to 180 days ahead, every day or on selected weekdays; existing or booked slots are never overwritten. Slots can be filtered by status and removed while they are still free
Appointments	See the upcoming consultations first, then the complete client history; open an appointment to confirm it, reject it, mark it as completed or cancel it. Rejecting a request releases the slot and notifies the customer
Personal Profile	Update the photo, name, phone, city, office address and biography; set the years of experience, the specializations and the consultation fee; upload the national ID, the licence number and the verification document. Uploading a new document sets the verification status back to Pending

[Screenshot: Lawyer dashboard and Schedule Management page]

8. Administrator Portal

Page	What the administrator can do
Dashboard	See the total customers, the total lawyers, the pending verifications, the appointments of the current month, the revenue of the month, the recent appointments and the pending lawyer verifications
Booking Appointments	List every appointment of the platform, filter by status and search by customer or lawyer, reschedule a booking to another free slot, or cancel it with a reason. A paid booking that is cancelled generates the customer refund
Lawyer Management	Filter lawyers by All / Pending / Approved / Rejected, review the submitted licence documents, approve or reject a registration, edit a lawyer profile, and disable or re-activate an account so it disappears from the search without deleting the verification history
User Management	View and search the customer list, filter by joining year and month, edit a customer record and deactivate or re-activate an account

Page	What the administrator can do
Reporting & Analytics	Choose a report year and read the number of appointments, the gross revenue, the active lawyers, the appointments and the revenue per month, the top performing lawyers and the customer engagement figures
Content Management	Publish, edit and delete the FAQ entries, the guides / notices, the announcements and the Legal News items shown on the public pages

[Screenshot: Admin dashboard and Lawyer Management page]

9. Conclusion

LegalEase supports three roles – customer, lawyer and administrator – and each role has its own set of pages, but all of them are connected through one complete legal service workflow: search, booking, payment, consultation, review and administrative supervision.

Users should sign in with the correct account type in order to reach the correct portal. For any problem with the installation or with the local server, please read the **Installation Guide** delivered together with this document.
